ance Notes on Codes and Abbreviations" appearing at the begin-
ning of each regular issue of the PCT Gazette.

WO 2005/049841 A1

(54) Title: INSECT RESISTANCE USING INHIBITION OF GENE EXPRESSION

(57) Abstract: The current invention provides methods to silence insect genes by using unpackaged dsRNA or siRNA, in one em-
bodiment such dsRNA or siRNA is present in plant vascular tissue, preferably phloem, more particularly phloem sap, and the insect
is a plant sap-sucking insect. Also provided are DNA sequences which when transcribed yield a double-stranded RNA molecule
capable of reducing the expression of an essential gene of a plant sap-sucking insect, methods of using such DNA sequences and
plants or plant cells transformed with such DNA sequences. Also provided is the use of cationic oligopeptides that facilitate the entry
of dsRNA or siRNA molecules in insect cells, such as plant sap-sucking insect cells.
